

Transportation updates for 2009-10:

Families in rural service areas that are not consistent daily riders are asked to **CALL WHEN RIDING**. This saves everyone on the bus time and increases our cost efficiency. Your Driver can provide further information.

A number of construction concerns and detour routes may affect service in isolated areas during the school year. Pick up and drop off schedules/locations may require additional flexibility for families during these events.

We have compiled an overview of major morning route points. This is not a complete list of actual routes of each bus, but rather a list of check points for families to determine which bus services their neighborhood and a basis to estimate drop off/pick up times.
